
(a) 1024 independent initial conditions
I_2 (10^{-3})
I_1 (10^{-3})
WBA agreement (decimal digits)
(b) First 8 fixed trajectories
Maximum WBA difference
Window length T (dimensionless)
h = 1/16
h = 1/32
h = 1/64
h = 1/128
(c) Integration error, fixed initial points
Maximum error (first 64)
Relative energy drift
WBA difference
Integration step h
(d) Same 1024 points; refined integration
Finite-time candidate fraction (%)
1024/1024 at all three thresholds
95% exact sampling interval: [99.6404%, 100%]
Required agreement (decimal digits)
